

Life Cycle of Plants “Flip Book”

20 points

- You will illustrate the life cycle of plants by creating a flip book
- It must contain AT LEAST 10 cards
 - First card should have title and your name
 - Front of remaining 9 (or more) cards should illustrate the 9 stages of the life cycle of plants
 - You can add more “slow motion detail” to your flip book by making extra pages in between these stages
 - Back of cards should describe each stage of the life cycle in words
- Getting started
 - Cut each of your index cards in half
 - Create your title card (that includes your name)
 - On the rest of the cards, measure in 2 inches from the LEFT and draw a vertical line on the front of each card
 - You are NOT to draw to the left of this line
 - Draw and COLOR each stage of the life cycle on the front, right-hand side of each card (use pages 59-62 in your book to help)
 - On the back of each card, describe each stage of the life cycle in words (see your notes for specific information)
 - Put your cards in order
 - Staple them on the left to finish off your flip book
- Make sure your flip book is colored and neatly done!
